

Exploring Associations between Streetscape Factors and Crime Behaviors Using Google Street View Images

Mingyu DENG, Wei YANG, Chao CHEN, Chenxi LIU

Frontiers of Computer Science, DOI: [10.1007/s11704-020-0007-z](https://doi.org/10.1007/s11704-020-0007-z)

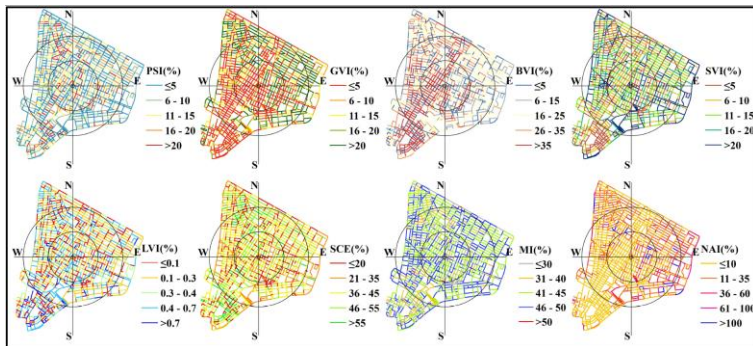

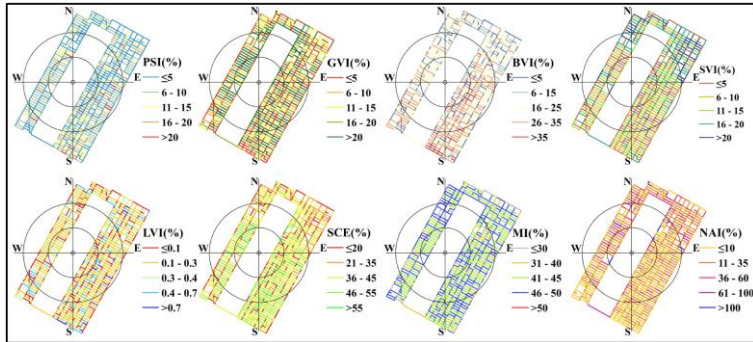

Problems & Ideas

- Problems of understanding the associations between streetscape factors and crime behaviors.
 - The influence of streetscape on crime behaviors has been neglected due to the lack of fine-scale quantitative data of the visual streetscape.
 - It is still unclear about the influencing mechanism between streetscape factors and urban crime.
- Ideas: Quantifying the characteristics of streetscapes and exploring the influence mechanism between streetscapes and crimes.

Main Contributions

- Visualization results of 8 indexes

- GWPR local coefficients for 8 indexes
