

Author Notes Provided by Corresponding Authors

David Bamford

David Bamford is a professor of operations management at the Business School of the University of Huddersfield (Huddersfield HD1 3DH, UK; Email: d.r.bamford@hud.ac.uk). His research interests and areas include operations management and quality management.

Zong-yuan Huang

Zong-yuan Huang is a professor and a doctoral supervisor at the China Economic Technology Research Center in Beijing Jiaotong University. His research interests and areas include economics and engineering economics.

Correspondence concerning this paper should be addressed to Zong-yuan Huang, China Economic Technology Research Center, Beijing Jiaotong University, Beijing, 100044, China. Email: zyhuang@bjtu.edu.cn

Bo-cong Li

Bo-cong Li is a professor of philosophy at the University of Chinese Academy of Sciences, Editor-in-Chief of *Journal of Engineering Studies* and Depute Editor-in-Chief of *Studies in Dialectics of Nature*. His research interests and areas include philosophy of science, philosophy of engineering, and sociology of engineering. He has published several books, including *An Introduction to Philosophy of Engineering* (2002), *Selection and Construction* (2008), *An Introduction to Sociology of Engineering* (co-author, 2010) and *Theory of Engineering Evolution* (co-author, 2011).

Hui Liu

Hui Liu is a Ph.D. Candidate at the Department of Engineering Management, Central South University (Changsha, China, 410075) and a joint Ph.D. candidate at the Department of Civil and Environmental Engineering, University of Maryland (College Park, MD 20742-3021, USA). Her research interests and areas include engineering management and construction innovation.

This research was supported in part by grants from National Science Foundation of China (71273283/G0307), the Specialized Research Fund for the Doctoral Program of Higher Education of China (20130162110022) and the Soft Science Research Plan Funded Project of Hunan Province (2014ZK3079).

Correspondence concerning this paper should be addressed to Hui Liu, Department of Engineering Management, Central South University, Changsha, 410075, China. Email: tumeier1987@hotmail.com

You-mei Lu

You-mei Lu is a professor-engineer at China Three Gorges Corporation, a professor at Tsinghua University, and a member of the Chinese Academy of Engineering. His research interests and areas include hydraulic engineering management and hydraulic engineering technology.

Correspondence concerning this paper should be addressed to You-mei Lu, China Three Gorges Corporation, Beijing, 100038, China. Email (Secretary): shang_cunliang@ctg.com.cn

Cun-liang Shang

Cui-lang Shang is an engineer at China Three Gorges Corporation. His research interests and areas include hydraulic engineering management and hydraulic engineering technology.

Correspondence concerning this paper should be addressed to You-mei Lu, China Three Gorges Corporation, Beijing, 100038, China. Email: shang_cunliang@ctg.com.cn

An-lin Shao

An-lin Shao is a professor of engineering, vice president of the Metallurgical Mines Association of China, vice general manager of Ansteel Group Corporation, dean of mining institute of University of Science and Technology Liaoning. Shao has proposed the “grade decision-based multi-system integration” engineering management mode and has undertaken multiple projects about mining and processing. Shao was awarded 2 second-class State Science and Technology Prizes, and 1 first-class National Management Innovation Prize. Moreover, Shao has two invention patents and has published 4 books and 15 articles in leading academic journals.

This research was supported by the State Science and Technology Support Program (2013BAB02B08, 2013/01–2016/12).

Correspondence concerning this paper should be addressed to An-lin Shao, Ansteel Mining Company, Anshan, Liaoning, 114001, China. Email: alshao@163.com

Mirosław J. Skibniewski

Mirosław J. Skibniewski is a professor at the Department of Civil and Environmental Engineering, University of Maryland (College Park, MD 20742-3021, USA; Email: mirek@umd.edu). His research interests and areas include construction robotics, implementation of advanced technologies in construction projects.

Ji-ming Wang

Ji-ming Wang is a professor-engineer and a vice-president of China Petroleum and Chemical Industry Federation, a member of the Chinese Academy of Engineering, a professor and doctoral supervisor at East China University of Science and Technology. His research interests and areas include petroleum engineering, petroleum technology, and engineering management.

Correspondence concerning this paper should be addressed to Ji-ming Wang, China Petroleum and Chemical Industry Federation, Beijing, 100732, China. Email (Secretary): liujun@sinopec.com

Meng-jun Wang

Meng-jun Wang is a professor and a doctoral supervisor at the Department of Engineering Management, Central South University. Her research interests and areas include engineering management and construction innovation.

Correspondence concerning this paper should be addressed to Meng-jun Wang, Department of Engineering Management, Central South University, Changsha, 410075, China. Email: wmjcs@163.com

Wei-dong Wang

Wei-dong Wang is an associate professor of engineering at the Department of Railway Engineering, School of Civil Engineering, Central South University. His research interests and areas include railway engineering and engineering

management.

Correspondence concerning this paper should be addressed to Wei-dong Wang, School of Civil Engineering, Central South University, Changsha, 410075, China. Email: 147745@163.com

Ying-luo Wang

Ying-luo Wang is a professor and a doctoral supervisor, and Honorary Chairman of the School of Management, Xi'an Jiaotong University, and a member of the Chinese Academy of Engineering. His research interests and areas include management science, management technology, engineering management, and engineering management education. He is the author of 22 monographs, 8 textbooks, and over 300 papers, and the winner of 9 national and provincial prizes in science and technology.

Correspondence concerning this paper should be addressed to Ying-luo Wang, School of Management, Xi'an Jiaotong University, Xi'an Shaanxi, 710049, China. Email: ylwang@mail.xjtu.edu.cn

Shou-bo Xu

Shou-bo Xu is a professor and a doctoral supervisor at the China Economic Technology Research Center of Beijing Jiaotong University, and a member of the Chinese Academy of Engineering. His research interests and areas include energy engineering, energy strategy, economics of technology and economics of engineering.

Jian-bo Yang

Jian-bo Yang is a professor at the Business School of the University of Manchester. His research interests and areas include quality management, supply chain management and environmental management. Over the last 20 years, Yang has been conducting research in the areas of multiple criteria decision analysis using both quantitative and qualitative information with uncertainties, hybrid decision methodologies using techniques from both operational research and artificial intelligence, multiple objective optimisation, linear and non-linear programming, intelligent decision support systems, and dynamic system modelling, simulation and control of engineering and management systems. The current application areas cover design decision-making, quality management, risk and safety assessment, supply chain management and environmental management.

Correspondence concerning this paper should be addressed to Jian-bo Yang, Manchester Business School, The University of Manchester, Manchester M13 9PL, UK. Email: jian-bo.yang@mbs.ac.uk

Rui-yu Yin

Rui-yu Yin, a member of Chinese Academy of Engineering, served as chief engineer and deputy general manager of Tangshan Iron and Steel Company, chief engineer and vice minister of the former Ministry of Metallurgical Industry of PRC, vice president of the Chinese Society for Metals, president of Central Iron and Steel Research Institute, director of Chemistry, Metallurgy and Materials Division of CAE, and director of Engineering Management Division of CAE; and is member of the Governing Board of CAE, honorary president of the Chinese Society for Metals and honorary president of Central Iron & Steel Research Institute. He has been studying the development strategy for metallurgical science and technology as well as steel industry. His research interests and areas include metallurgical engineering, engineering management and engineering philosophy. He did a lot of studies on engineering technologies and theories, working out the strategy for advancing China's steel technology and its orderly implementation in 1990s. He made great efforts in making breakthrough of key common metallurgy technologies across China. He originated and expounded a series of theoretical views including steel manufacturing process analysis and integration, structural optimization and development mode of steel plants, green manufacturing and circular economy in steel industry. Since the beginning of the 21st century, he has been playing a developing role for the study of engineering philosophy. He is author of books such as *Metallurgical*

Process Engineering, Philosophy of Engineering, Theory and Method of Metallurgical Process Integration, and Theory of Engineering Evolution.

Correspondence concerning this paper should be addressed to Rui-yu Yin, China Iron & Steel Research Institute Group, Beijing, 100081, China. Email (Secretary): zhangxx1977@163.com

Zhen-sen Zhang

Zhen-sen Zhang is a Ph.D. Candidate at the Department of Engineering Management, Central South University (Changsha, 410075, China. Email: zzscsu@163.com). His research interests and areas include engineering management and construction innovation.
