

## Author Notes Provided by Corresponding Authors

### Naomi J. Brookes

Naomi J. Brookes is a professor and a chair in Complex Project Management in the School of Civil Engineering in the University of Leeds, UK, where she is a member of both the Engineering Project Academy and the Institute of Resilient Infrastructure. Her work focuses on the development of holistic approaches to designing and delivering large scale engineering projects. In addition to research work undertaken for the UK government in the field of major project management, she is also the Action Chair of an EU funded initiative called MEGAPROJECT ([www.mega-project.eu](http://www.mega-project.eu)). As MEGAPROJECT Action Chair, she has interacted with organizations such as OECD, the Nuclear Development Agency, the European Investment Bank, the World Bank, the European Commission and the International Project Management Association.

### Roger Flanagan

Roger Flanagan is a professor of Construction Management, School of Construction Management and Engineering, University of Reading, UK. He is currently a visiting professor at the University of Hong Kong, Tsinghua University, University of Technology of Malaysia, University of New South Wales, Australia, and Chongqing University. Professor Flanagan has experiences of working in UK, Middle East, USA, Canada, Finland, Norway, Australia, New Zealand, and South Africa, and has undertaken studies for the development of the construction industry in the UK, Canada, Malaysia, South Korea, Sweden, Libya and Estonia.

### Ji-shan He

Ji-shan He, a member of the Chinese Academy of Engineering, is a professor at Central South University. Professor He is the founder of the theories and methods of “Dual Frequency Induced Polarization (DFIP)”, “Wide Filed Electromagnetic (WFEM)”, and “Pseudo-Random Signal Electrical Methods (PRSEM)” for detecting natural resources of old gas and metal ore bodies. Based on these theories and methods, Professor He invented and developed a series of geographical instruments. His theories, methods and instruments have been widely used, and vast mine resources have been found. Professor He is also the inventor of “Imitating Flow Field Method (IFFM)”, which, widely applied throughout China, proved to be an effective method in detecting hidden leakages in banks, dams, mines and buildings. Professor He has been paying much attention to the development of the discipline of management science and engineering, and has done a lot of research on the theory and practice of engineering management in the past 20 years, publishing a monograph and a number of papers, influential in the field of engineering management.

### **Ning Liu**

Ning Liu, born in Dandong City, Liaoning Province, is a professorial senior engineer of The Ministry of Water Resources of the People's Republic of China. His research areas include water and hydro-power planning, hydro-power design and engineering management.

Correspondence concerning this paper should be addressed to Ning Liu, The Ministry of Water Resources of the People's Republic of China, Beijing, 100053, China. Email: liuning@mwr.gov.cn

### **Qing-guo Ma**

Qing-guo Ma is a professor and a doctoral supervisor at Department of Management Science and Engineering, School of Management, Zhejiang University. His research interests and areas include neuro-management, behavioral decision making, neuro-industrial engineering, neuro-marketing, and engineering management.

The research was supported by grants from the National Natural Science Foundation of China (90924304 and J2013079), a grant (09JZD0006) from the State Education Ministry of China, and a grant from the 211 Project, Management Theory and Development Strategy of Entrepreneurship and Innovation.

Correspondence concerning this paper should be addressed to Qing-guo Ma, Neuromanagement Lab, School of Management, Zhejiang University, 38 Zheda Road, Hangzhou, 310027, China. Email: maqingguo3669@zju.edu.cn

### **Mirosław J. Skibniewski**

Dr. Mirosław J. Skibniewski is the A. James Clark Endowed Chair Professor of Construction Engineering and Project Management in the Department of Civil and Environmental Engineering at the University of Maryland in College Park. Prior to his current appointment he served for 20 years as a faculty member and administrator at Purdue University in West Lafayette, Indiana, where he held a position of Professor of Civil Engineering, Construction Engineering and Management. Prior to his academic career, he worked in the industry as an engineer with the Pittsburgh Testing Laboratory, a nationwide construction engineering consulting firm in Pennsylvania later renamed to Professional Service Industries, Inc., where he was engaged in design quality reviews, construction related claims, value engineering, forensic engineering and industrial safety investigations. As a researcher and an educator, Professor Skibniewski currently specializes in e-commerce and sustainable technology applications to engineering project management.

Correspondence concerning this paper should be addressed to Mirosław J. Skibniewski, Department of Civil & Environmental Engineering, University of Maryland, 1188 Glenn L. Martin Hall, College Park, Maryland 20742, USA. Email: mirek@umd.edu

### **Yong-fu Sun**

Yong-fu Sun, the Co-Minister of Railways of China from 1984 to 2006, and an adjunct professor at Beijing Jiaotong University, Hefei University of Technology and Central South University, is a member of the Chinese Academy of Engineering and the director-general of China Railway Society. He is the author of the books *On the Management of Railway Construction* and *a History of China's Railway Construction*. His research interests and areas include railway construction strategy, railway construction project management, and engineering management.

Correspondence concerning this paper should be addressed to Yong-fu Sun, China Railway Society, Beijing, 100844, China. Email (secretary): slamliu@126.com

### **Li-da Xu**

Li-da Xu, a professor at Old Dominion University, USA, serves as the Founding Chair of the IEEE SMC Society Technical Committee on Enterprise Information Systems, and the Founding Editor-in-Chief of the engineering journal entitled *Enterprise Information Systems*. Professor Xu collaborated and worked extensively with pioneering scholars such as West Churchman, John Warfield, and Xue-sen Qian, and furthermore, he spearheaded early research and educational activities in the field of information systems and enterprise systems. He is the co-author of the recent book *Systems Science: Methodological Approaches* published by Taylor & Francis Group.

Correspondence concerning this paper should be addressed to Li-da Xu, Department of Information Technology and Decision Sciences, Old Dominion University, Norfolk, VA 23529, USA. Email: lxu@odu.edu

### **Jin Wang**

Jin Wang is an associate professor at School of Civil Engineering, Central South University. His research interests include project management, engineering ethics and engineering education.

Correspondence concerning the 2 brief biographies should be addressed to Jin Wang, Department of Project Management, School of Civil Engineering, Central South University (Railway Campus), 22 Shaoshan Road, Changsha, 410004, China. Email: csruwangjin2@126.com

### **Han-peng Zhang**

Han-peng Zhang is an associate professor at Southwestern University of Finance and Economics. He received PhD of Management and Engineering from Beihang University in 2007. He is the author of 2 books and many research papers. His current research interests and areas include supply chain management and emergency logistics.

This research was in part supported by grants from the National Natural Science Foundation of China (70801049, 71201128 and 71302187) and a grant in Humanities and Social Sciences Project (14XJC630010) from the Ministry of Education.

Correspondence concerning this article should be addressed to Han-peng Zhang, Department of Logistics Management, Southwestern University of Finance and Economic, Chengdu, 610074, China. Email: zhanghanpeng@163.com

### **Xiao-ge Zhang**

Xiao-ge Zhang is a teacher and a researcher of English studies at School of Foreign Languages, Central South University. Her research interests and areas include literary criticism, science education, and engineering education.
