

Driving comparative advantage in emerging industries: The interplay of location endowments and industrial agglomeration across 290 Chinese cities

Appendix Table

Emerging industries for each cluster			
No.	Cluster I	Cluster II	Cluster III
1	The advanced inorganic nonmetal material industry;	The next-generation information network industry;	The other biological industry;
2	The advanced nonferrous metal materials industry;	The internet and cloud computing, big data service industry;	The biological agriculture and related industries.
3	The advanced environmental protection industry;	The artificial intelligence industry;	
4	The advanced petrochemical chemical new material industry;	The other related service industries;	
5	The advanced steel materials industry;	The satellite and application industries;	
6	The cutting-edge new materials industry;	The digital creativity and integration service industry;	
7	The solar industry;	The digital creative technology equipment manufacturing industry;	
8	The new technology and innovation and entrepreneurship service industry;	The digital cultural creative activity industry;	
9	The new material related service industry;	The emerging software and new information technology services industries;	
10	The new energy vehicle manufacturing industry;	The electronic core industry.	
11	The new energy vehicle related service industry;		
12	The new energy vehicle related facilities manufacturing industry;		
13	The new energy vehicle equipment, parts manufacturing industry;		
14	The intelligent manufacturing equipment		

- industry;
- 15 The smart power grids industry;
- 16 The nuclear power industry;
- 17 The marine engineering equipment
 industry;
- 18 The biomedical engineering industry
- 19 The bio-pharmaceutical industry;
- 20 The biomass energy industry;
- 21 The biomass energy and other new
 energy industries;
- 22 The aviation equipment industry;
- 23 The design service industry;
- 24 The resource recycling industry;
- 25 The rail transit equipment industry;
- 26 The wind energy industry;
- 27 The high performance fibers and
products and composites industry;
- 28 The energy efficient industry.
