

Inaugural message from the Editor

It is my great pleasure to introduce the inaugural issue of *Intelligent Pharmacy*, a peer-reviewed, fully open access journal that aims to publish groundbreaking research on the intersection of pharmacy, artificial intelligence, big data and information technology.

As Editor-in-Chief, I am proud to present the fruits of our collective efforts to advance the field of pharmacy through innovative and cutting-edge research. Our journal is dedicated to providing a platform for scholars, researchers, and practitioners to share their discoveries and insights, and to foster collaboration across disciplinary boundaries.

The exponential growth of technological advancements has revolutionized virtually every aspect of human life, and pharmacy has not been left behind. The use of artificial intelligence, big data, and information technology in pharmacy practice and research has opened up new avenues for improving patient care and drug development, with implications for health outcomes, public health, and healthcare economics.

Pharmacy, as a discipline, has undergone tremendous evolution over the years, spurred by advances in technology and the ever-increasing demand for more efficient healthcare delivery. Intelligent pharmacy is a modern concept that aims to improve the efficiency, safety, and quality of pharmacy services through the integration of advanced technologies such as artificial intelligence, big data, and the Internet of Things.

Intelligent Pharmacy welcomes submissions from a broad range of areas within the pharmacy profession, including pharmaceutical chemistry, pharmacology, pharmacoepidemiology, clinical pharmacy, and pharmacy administration, among others. We encourage authors to submit original high-quality research papers, reviews, short communications, and perspective papers that cover a wide spectrum of topics related to the application of advanced technologies in pharmacy.

Our editorial team is comprised of experts in various fields of pharmacy, ensuring that all papers undergo rigorous peer review and are evaluated based on their scientific merit, originality, and potential impact on the field. We are committed to promoting open science and making our content available to everyone, with no barriers to access.

In closing, I would like to express my gratitude to our esteemed editorial board members, reviewers, and authors who have contributed to the launch of this journal. I look forward to working with you all in shaping the future of pharmacy research.
