

Table S2. The datasets without distinction of amino acid types

Dataset	Number of Monomers	Number of Surface Residues	Number of Interface Residues	Percentage (%)	Benchmark Version
Training set	68	13829	1912	13.8	3.0
Validation set	40	7346	1024	13.9	4.0 (updated)
Test set	26	5759	639	11.1	5.0 (updated)
Sum	134	26934	3575	13.3	5.0

The data information shown above are mainly composed of the number of monomers, surface residues and interface residues, the percentage of interface residues in different datasets.
